

A man and a woman are embracing each other from behind. The man is wearing a blue denim shirt and the woman is wearing a red and white plaid shirt. They are standing in front of a two-story house with a porch. The house has a dark brown door with a wreath, a white mailbox, and a white pillar on the porch. There are green bushes and trees in the background.

- Home sales/Inventory
- Mortgage interest rates
- Employment/Labor market
- Limited inventory of quality homes
- Lending guidelines
- Preparation including prequalification

Houses Sold in the U.S.

NEW AND EXISTING HOME SALES, IN THOUSANDS — SEASONALLY ADJUSTED ANNUAL RATE

Sales of existing homes (including single-family, condos and co-ops) totaled 6.1 million units in 2021, which was 8% above 2020 sales and the highest since 2006. New home sales slowed to 763,000 in 2021, down 7% from 2020 but otherwise the highest level of sales since 2007. The pace of new home sales has been limited by labor and supply chain constraints, which has caused homebuilders to hold back sales activity to manage through these challenges. Existing home sales are based on the closing of contracts signed one to two months earlier, while new home sales are counted at the time of signing.

Source: NAR, U.S. Census Bureau, Moody's Analytics, Arch MI

Monthly Supply of Homes for Sale

MONTHS' SUPPLY OF HOMES FOR SALE

The inventory of homes for sale remains near record lows. The months' supply of existing single-family homes for sale (total seasonally adjusted listings ÷ last month's seasonally adjusted annualized sales pace) was 2.1 months as of December 2021, down from an average of 3.1 months in 2020 and the pre-pandemic average of 4.5 months. The months' supply of new homes for sale dropped to 6.0 months in December from 7.2 months in October. However, an unusual share of the new home inventory comprises units still under construction and units not yet started due to builder backlogs. Considering only the inventory of completed homes for sale, the inventory was equivalent to 2.5 months of supply in December, down from an average of 2.6 months in 2020 and the pre-pandemic average of roughly 4 months.

Source: NAR/Moody's Analytics/Arch MI

Multi- and Single-Family Housing Starts

Housing and Mortgage Market Indicators

HOUSING STARTS, IN THOUSANDS — SEASONALLY ADJUSTED ANNUAL RATE

Single-family housing starts reached their highest level since 2007 in December 2020 at 1.3 million units (seasonally adjusted annual rate) and have remained elevated at about 1.2 million units as of December 2021. Despite supply constraints impacting construction activity, the current pace of single-family housing starts is nearly 25% above the pre-pandemic pace. Additionally, the pace of multi-family starts increased to about 530,000 units (annualized rate) in December, nearly 15% above the pre-pandemic pace.

Interest Rates

- Historical perspective
- Volatile – can change at any time (intraday)
- Factors influencing rates:
 - Ten Year Treasury
 - Federal Reserve
 - Political and Economic Events (domestic and international)
- Securitizations / Freddie Mac & Fannie Mae
- How to get the best rate

Historical Rates

15 year Interest Rate Comparison - 30 Year Fixed & 5 year ARM

Product Comparison

Fixed *(30 Year Fixed Rate)*

- Higher initial rate
- Higher initial payment
- Limited purchasing power
- 30 year amortization
- Rate fixed for life of the loan
- Favorable if rising rates

ARM *(3 to 7 Year Fixed Rate)*

- Lower initial rate
- Lower initial payment
- Higher purchasing power
- 30 year amortization
- Rate fixed for initial term
- Favorable if declining rates

What is the best loan for me?

Questions to Consider:

- Average length of loan
- First time home buyer
- Personal housing demand
- Length of residence
- Tolerance for payment changes
- New payment vs. current housing expense
- Income cycle – Do you foresee any changes?

ARM/Fixed Rate Comparison

Assume \$200,000 Loan

Mortgage	Rate	Monthly Payment
30 Year Fixed	4.25%	\$ 983.88
5 Year ARM	3.375%	\$ 884.19

ARM monthly savings = \$99.69

ARM annual savings = \$ 1196.00

Keys to Qualifications

Evaluation Criteria Overview

- Capacity
- Income/ Employment Stability
- Assets / Savings
- Credit Worthiness
- Collateral

Capacity/ Income Stability

- Employment history
- Education
- Debt to income
- Disposable income
- Payment shock
- Income trend

Debt to Income

Basic Rule:

Gross monthly income x 28%* = **Total housing expense**

Gross monthly income x 36%* = **Housing plus all other time payments**

**Variances Allowed*

Assets/Savings

Funds to Close

- Savings
- 401K
- Gift funds
- Minimum 3% down payment*
 - ✓ First-time Home Buyer
 - ✓ No ownership for 3 years
 - ✓ Down payment and closing costs can be a gift

*Varies by property and loan type

Source of Down Payment Funds

Source of funds:

- Deposits
- Secured loan
- Sale of assets
- Gift
- Earnest deposits

Keys:

- Establish depository account
- Demonstrate history of savings
- Funds will be verified

Example: \$200,000 Purchase

Down payment	\$10,000
Closing costs	\$4,000
Reserves	\$3,000
Total Cash*	\$17,000

** Plus any moving expenses*

Down Payment Amount and PMI

- Required on all loans with less than 20% down payment
- Premium amount function of:
 - ✓ Loan type
 - ✓ Loan amount
 - ✓ Credit history
- Borrower benefits from being able to obtain financing
- Lender benefits from insurance protection

Private Mortgage Insurance Comparison

Assume \$200,000 Loan

Mortgage Term	LTV	FICO Score	Monthly Premium
30 Year Fixed	95%	740	\$51.67
30 Year Fixed	95%	680	\$101.67
15 Year Fixed	95%	740	\$41.67
15 Year Fixed	95%	680	\$81.67

Credit History / FICO Score

- FICO scores are your credit rating
- They range from 300 – 850
- Higher scores mean lower interest rates

Credit History / FICO Score

FICO scores are calculated based on your rating in five general categories:

Components of FICO

Credit Score

COMPONENTS

Payment History (35%)

- Is the most important factor
 - Making your payments on time help score.
 - Late payments (30 days past due date) hurt score
 - More recent and numerous late payment's hurt score
 - Collection accounts or legal action serious negative impact
- Time distance from late payments reduce negative impact

Credit Score

COMPONENTS

Utilization 30%

- Balances on Revolving Debt
Close to Credit Limit
- Correlation Between
Outstanding Balance and Credit
Limit
- More Credit Available Relative
to Actual Balance Positive

Length of Credit 15%

- Longer Dated Accounts
Favorable

Type of Credit 10%

- Variety to Boost Score
- Credit Cards
- Retail Accounts
- Direct Loan

Credit Score

COMPONENTS

New Credit 10%

- It's OK to Use Credit!
- Number of Recently Opened Accounts
- Proportion of Recently Opened Accounts to All Accounts
- Inquiries
- New Accounts can Damage Your Score, Especially in Comparison to Total Accounts

Gurnee, IL 60031

Thank you for choosing Abbott Laboratories Employees Credit Union to provide you with financing for a new home. Your pre-approval for a mortgage has been approved with the following terms:

Loan Type:	30 Year Fixed
Loan Amount:	\$160,000
Value:	\$200,000
Estimated Payment:	\$1,583.88

Total payment includes estimated taxes, insurance, mortgage insurance, and association dues if applicable. This pre-approval has been issued based on the information you provided in our on-line application and the credit information we obtained with your permission. At this time your rate is not locked and rates are subject to change on a daily basis. If any information is to change, the pre-approval may not be valid. Credit may need to be re-run at the time of approval to adhere to investor changes and guidelines.

Of course, after you decide on a new home, we must still document your income, assets, liabilities and other relevant information (such as property value and title information). We will also require the necessary documents with respect to the purchase of the any land and all contract agreements with builders. Finally, we must show evidence of sufficient funds to close the loan per the underwriting regulations.
